

Knowledge Is Power Understanding Your Bill

MARYLAND DIVISION

Circumstances affecting your monthly bill include changes in the weather, the number and type of appliances you use, the amount of time you spend at home and more. **The following is a brief explanation of the bill you will receive from Chesapeake Utilities and the charges approved by the Public Service Commission (PSC).**

Monthly bills will reflect usage based on the read taken from your meter, which will vary from month to month depending on how much energy you use and the current cost of natural gas.

HOW TO READ YOUR CHESAPEAKE UTILITIES BILL

ACCOUNT SUMMARY

- A CURRENT SERVICE PERIOD** - This is the date range of energy usage included on this bill.
- B PREVIOUS AMOUNT DUE** - The amount owed from the previous bill, including any unpaid balances.
- C PAYMENTS RECEIVED SINCE LAST STATEMENT** - Credits or payments received during the last billing period.
- D CURRENT MONTH'S CHARGES** - The amount charged for the current billing period.
- E AMOUNT DUE** - This is the amount you owe on this bill. This includes: the previous balance; payment(s) made toward that balance; any unpaid balance forward from the prior month's bill; your current month's bill amount; and your current balance.
- F MONTHLY USAGE** - A month-over-month comparison of your bill, reflecting the number of therms used per month and the average daily temperature for each month.

Statement Date: Feb 04, 2026

1 ACCOUNT # - This is your account number with Chesapeake Utilities. Please mark all correspondence and payments with this number to ensure your account is properly identified.

2 DUE DATE - Although your monthly bill is due and payable upon receipt, it becomes past due if not paid by the "due date" on your bill.

3 STATEMENT DATE - The date the invoice was issued.

4 SERVICE FOR - This is the address of the property receiving natural gas services from Chesapeake Utilities.

5 METER READ - Your meter is read at regular intervals to measure your gas usage. When you subtract your previous reading from your current reading, you know how much gas was used. All meter readings are actual unless circumstances prevented the meter from being read. In this case, the present reading will be estimated, and your bill could be adjusted after the next meter reading.

6 SERVICE PERIOD - This is the date range of energy usage included on this bill.

7 RATE SCHEDULE - Represents the rate schedule applicable to your account.

8 METER NUMBER - This number identifies your gas meter.

9 TYPE OF READING - Describes whether an actual or estimated meter read was taken.

10 BILLING PERIOD - The time period included in this bill.

11 DAYS - The number of days in this billing period - this number may fluctuate due to weekends, holidays or changes in the date we read your meter.

12 CURRENT READING - Represents the current reading taken from the meter on the date indicated.

13 PREVIOUS READING - Subtracted from the current reading to determine the amount of consumption to be billed.

14 GAS USED (CCF) - The amount of gas used when measured in CCFs (100 Cubic Feet).

15 METER MULTIPLIER - The meter multiplier is a number used to convert the meter reading into your actual energy usage.

16 BTU FACTOR - BTU is the factor used to convert one hundred cubic feet of natural gas to therms.

17 THERMS BILLED - A unit of heat measurement equal to 100,000 BTU. We calculate your bill based on how many therms of gas were used. **Example:** If you use 10 CCF of natural gas and the BTU factor is 1.03: $10 \times 1.03 = 10.3$ therms billed. *This example is for illustration only. Your actual BTU factor may vary.*

1 Account #: 000000000000
2 Invoice #: 800100017499
3 Due Date: March 05, 2026
4 Statement Date: Feb 04, 2026

5 Meter Read

6 Service Period: January 03, 2026 - February 03, 2026 **7 Rate Schedule:** MD Residential-2 (RES-2)

Meter Number	Type of Reading	Billing Period	Days	Current Reading	Previous Reading	Gas Used (CCF)	Meter Multiplier	BTU Factor	Therms Billed
2520522_10	Estimated	01/03-02/03	32	8,357	8,218	139	1	1.04090	144.69

Charge Details

18 Gas Current Charges

Customer Charge	\$10.00
Energy Charge (0.52068000 x 144.69)	\$75.34
Gas Sales Service Rate (GSR) (0.81600000 x 144.69)	\$118.07
Franchise Tax Rider (0.00402000 x 144.69)	\$0.58
Total Gas Current Charges	\$203.99

23 Total Current Month's Charges

\$203.99

	Last Yr	This Yr
*Therms This Month	142.12	144.69
Therms/Day	4.44	4.52
Service Days	32	32

*Usage and current rate pricing impact overall bill costs. Fluctuations in rate prices impact bill total even when usage remains the same.

18 GAS CURRENT CHARGES - The total charges for your current billing period, including natural gas usage, service fees, taxes, franchise fees and any other applicable charges.

19 CUSTOMER CHARGE - A fixed amount used to cover the cost of your service, meter and billing. This charge is applied regardless of the amount of natural gas you use and cannot be changed by Chesapeake Utilities without approval from the Public Service Commission.

20 ENERGY CHARGE - Billing components, aside from the cost of gas, associated with providing safe and reliable service, using tiered rates that vary based on your energy consumption.

21 GAS SALES SERVICE RATE (GSR) - The cost of the natural gas we purchase on your behalf. This cost is passed directly to customers without a profit or markup.

22 FRANCHISE TAX RIDER - A charge that may apply based on where you live. It covers the use of your town or city's public roads and rights-of-way to provide natural gas service.

23 TOTAL CURRENT MONTH'S CHARGES - The amount charged for the current billing period..

24 COMPARISON OF THERMS USED - Shows daily and monthly natural gas use in therms compared with the same periods last year.

How Weather Affects Your Energy Bills

and What You Can Do About It

Extreme weather can significantly impact your energy bills, because your energy use increases as your home works harder to maintain comfort. But there are steps you can take to keep your energy usage — and your bills — in check!

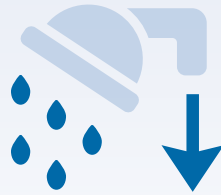

Tips to Lower Your Energy Bills

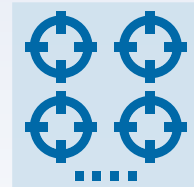

OPTIMIZE WINTER HEATING EFFICIENCY:

- › Set your thermostat wisely (68°F when home and lower it when sleeping or away).
- › Weatherize around doors and windows to prevent heat loss and ensure your attic, walls and floors have sufficient insulation to retain heat more effectively.

REDUCE HOT WATER USAGE:

- › Lower your water heater temperature to 120°F and wash clothes in cold water.
- › Keep hot showers short as possible and use low-flow showerheads to lower water heating costs.

BE ENERGY SMART:

- › Save with energy-efficient natural gas appliances.
- › Layer warm clothing to stay comfortable indoors with a lower thermostat setting.

Need More Help?

- › **Payment Assistance:** If you're still facing challenges, we offer payment extensions and assistance programs to help you manage your bills. Learn more: chpkgas.com/waystopay
